Subject: BC Hydro Electrical Upgrade at 1395 Beach Ave.

Tuesday, May 5, 2009

Hello Dr. Ballum; and
Hello to Vancouver Mayor in City Council;

While you have recently claimed that you and others at the city will review my submissions regarding the high power antenna system set up at 1395 Beach Ave. you must be aware that BCH will be in the back alley of **1395 Beach Avenue** on **May 7, 2009** to upgrade the electrical service of the building.

Thus, since **BCH Chairman Mr. Mossadiq Umedaly** is part of **Mayor Robertson's** newly *Minted Greenest City Action Team*, would you please forward this email to Mr. Umedaly, as I have a few questions to ask him regarding the electrical service upgrade to 1395 Beach Ave. which according to the notice in the elevator of my building, it is set for **May 7, 2009**.

Attach is the notice posted in the elevator of my building and while the notice says that a temporary electrical outage will take effect on May 7, it does not specify whether the electrical service upgrade will also include increasing the service to provide power for supplying the cell phone antennas on the **four outside walls and on the roof**.

I am also attaching photographs of some of BCH work done in recent weeks in the back alley of 1395 Beach Ave.

5/5/2009

Because switching the cables over, would not take as much time as what it claims on the notice attached herein, it appears what BCH has set out to do is shut the power down in the building at 1395 Beach Ave. until the second set of transformers is mounted on the pole and the apartment block is turned into a high radiation site when the power is switched on.

Specifically to Mr. Umedaly: I live at 1395 Beach Ave. thus I need to know whether the electrical service upgrade, which according to the notice, is set for May 7, 2009, is intended to connect the **4-conductor cable**, which appears to be to switch the overhead to underground at the power pole?

Also, will the feed to the power antenna system, which will draw as much power as the entire apartment system, going to be supplied from the already installed cables on this pole or is another set of transformers going to be installed which will mean a separate service to the antenna system on the roof of 1395 Beach Ave?

Whereas **Ralph Sultan** is the **B.C. Liberal** candidate in the safe seat of **West Vancouver-Capilano**, his campaign biography omits the details of his mining career, thus I am attaching a story from the **North Shore News** regarding Mr. Ralph Suttan and his role in the **Westray Disaster**. As you know or ought to know, turning 1395 Beach Ave. into a high power antenna industrial facility puts this on all those involved in the project. As lawyers like to say, with the **Criminal Code of Canada** and the provisions in the code that are general known as the **Westray Act**.

I would ask **Mr. Umedaly** and all other persons associated with the fund-raising that will turn 1395 Beach Ave apartment building into a **200,000 watt radiation antenna**, to please provide the requested information without any further delays at this email address.

PS Please confirm Dr. Ballum, whether you will forward my email to Mr. Umedaly and to all others concerned.

Sincerely,

Tina Zanetti

908-1395 Beach Ave.

Vancouver, BC V6E 1V7
